# Reframing Palestinian Water

# **Wastewater flows**

# It flows...through several forms of tenure

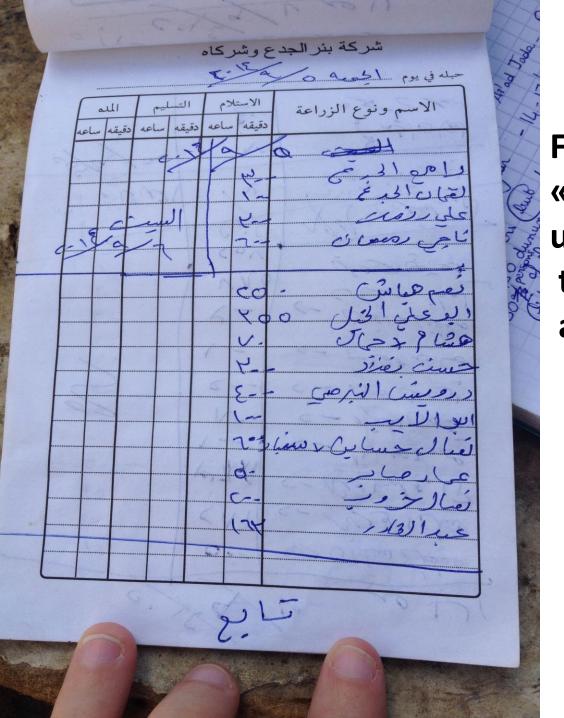

# Small scale farmers invest significantly in irrigation

Farmer run
« Informal » water tenure
usually means
tight regulation
and management

#### SURFACE WATER IN PALESTINE

Reusing » treated wastewatermeans redirectingwater from an initial

trajectory to a new trajectory

### Redirecting water from one trajectory to a new trajectory

**Creating new resources** 

Dispossessing the users along the former trajectory

To transfer the resource to users along the new trajectory

# Farmers don't resist using treated wastewater

### because of 'cultural reasons' or 'bad smells'
