# The aims of WaterWorX

WaterWorX aims to increase sustainable access to water and/or sanitation facilities, by:

1

strengthening the **financial, technical and social** sustainability of water companies in Africa, Asia and Latin America

2

strengthening the **enabling environment** of water utilities in terms of policies, laws & regulations and financing

3

increasing access to water infrastructure **investment finance**, by developing investment proposals and engaging with domestic and international financing organisations and banks
