

# WATER TO MITIGATE CLIMATE CHANGE: BEYOND THE OBVIOUS

## Introduction

**Dogan Altinbilek**, Vice-President, World Water Council

**Jean Launay**, President, French Water Partnership

**Climate action in urban water services to decrease greenhouse gas emissions and increase energy savings**

**Astrid Michels**, WaCClIM Project Manager, GIZ

**Reducing greenhouse gas emissions with respect to agricultural water**

**Olcay Ünver**, Deputy Director of Land and Water Division, FAO

**Energy recovery from wastewater and biomass: how circular economy is part of the solution?**

**Edouard Boinet**, Project Manager, International Office for Water

**Opportunities from innovation: moving the dial on climate-water challenges**

**Morgan Gillespy**, Head of Water, CDP

**Water for low-carbon energy production**

**Laurent Bellet**, Water and Energy Advisor, Sustainable Development Division, EDF

## Discussion

**Conclusion by the moderator**

**John H. Matthews**, AGWA
