Assessing the impact of women's involvement in water governance: Toward a joint project

Delphine Clavreul OECD Water Governance Programme

World Water Week 2017 28 August 2017, Stockholm, Sweden

Why a project on women's involvement in water governance?

- Water sector is <u>highly fragmented</u> as compared to other sectors or natural resources management activities
- Managing water resources and providing water services are <u>shared responsibilities</u> across public, private and non-forprofit actors
- There is an important link between gender equality and sustainable water management
- Topic has been discussed from local to global fora
- Women are key stakeholders in the water sector, but remain often unheard

⇒Lack of <u>policy guidance</u> and <u>policy tools</u> to scale-up success stories, enhance replicability and build the <u>case</u> for women's engagement in water governance

Where do we come from?

"Women play a central role in the provision, management and safeguarding of water for domestic purposes and agricultural use. But women often play a less powerful role than men in the management, problem analysis and decision making related to water" (OECD, 2015c)

Categories of stakeholders in water governance

OECD (2015), Stakeholder Engagement for Inclusive Water Governance, OECD Publishing, Paris

OECD framework conditions for stakeholder engagement in water governance

1. INCLUSIVENESS & EQUITY

2. CLARITY OF GOALS, TRANSPARENCY & ACCOUNTABILITY

3. CAPACITY & INFORMATION

NECESSARY CONDITIONS FOR STAKEHOLDER ENGAGEMENT IN WATER GOVERNANCE

4. EFFICIENCY & EFFECTIVENESS

5. INSTITUTIONALISATION, STRUCTURING & INTEGRATION

6. ADAPTIVENESS

The OECD Principles on Water Governance

Endorsed by OECD 35 Members during the 2015 MCM meeting

Policy questions to be addressed

- What is the <u>state of play</u> on women's involvement in water governance?
- What are the main <u>enabling/facilitating factors</u> to engage women that lead to their increased involvement in water governance?
- What are <u>good practices</u> of women's involvement at different levels of governance (national, basin, local) in the water sector?
- How to reinforce the involvement of women as a <u>policy lever</u> for effective, efficient and inclusive water governance?

Stage 1: Analysis of challenges and opportunities for women's engagement. Data collection: survey in OECD/non-OECD countries on drivers, obstacles, and mechanisms related to women's engagement, and assessment

Stage 2: Lessons from practice. Collection of case studies

Stage 3: Action plan to foster women's empowerment and engagement. Set of policy recommendations
