

Tackling Inequalities in the Era of the Sustainable Development Goals

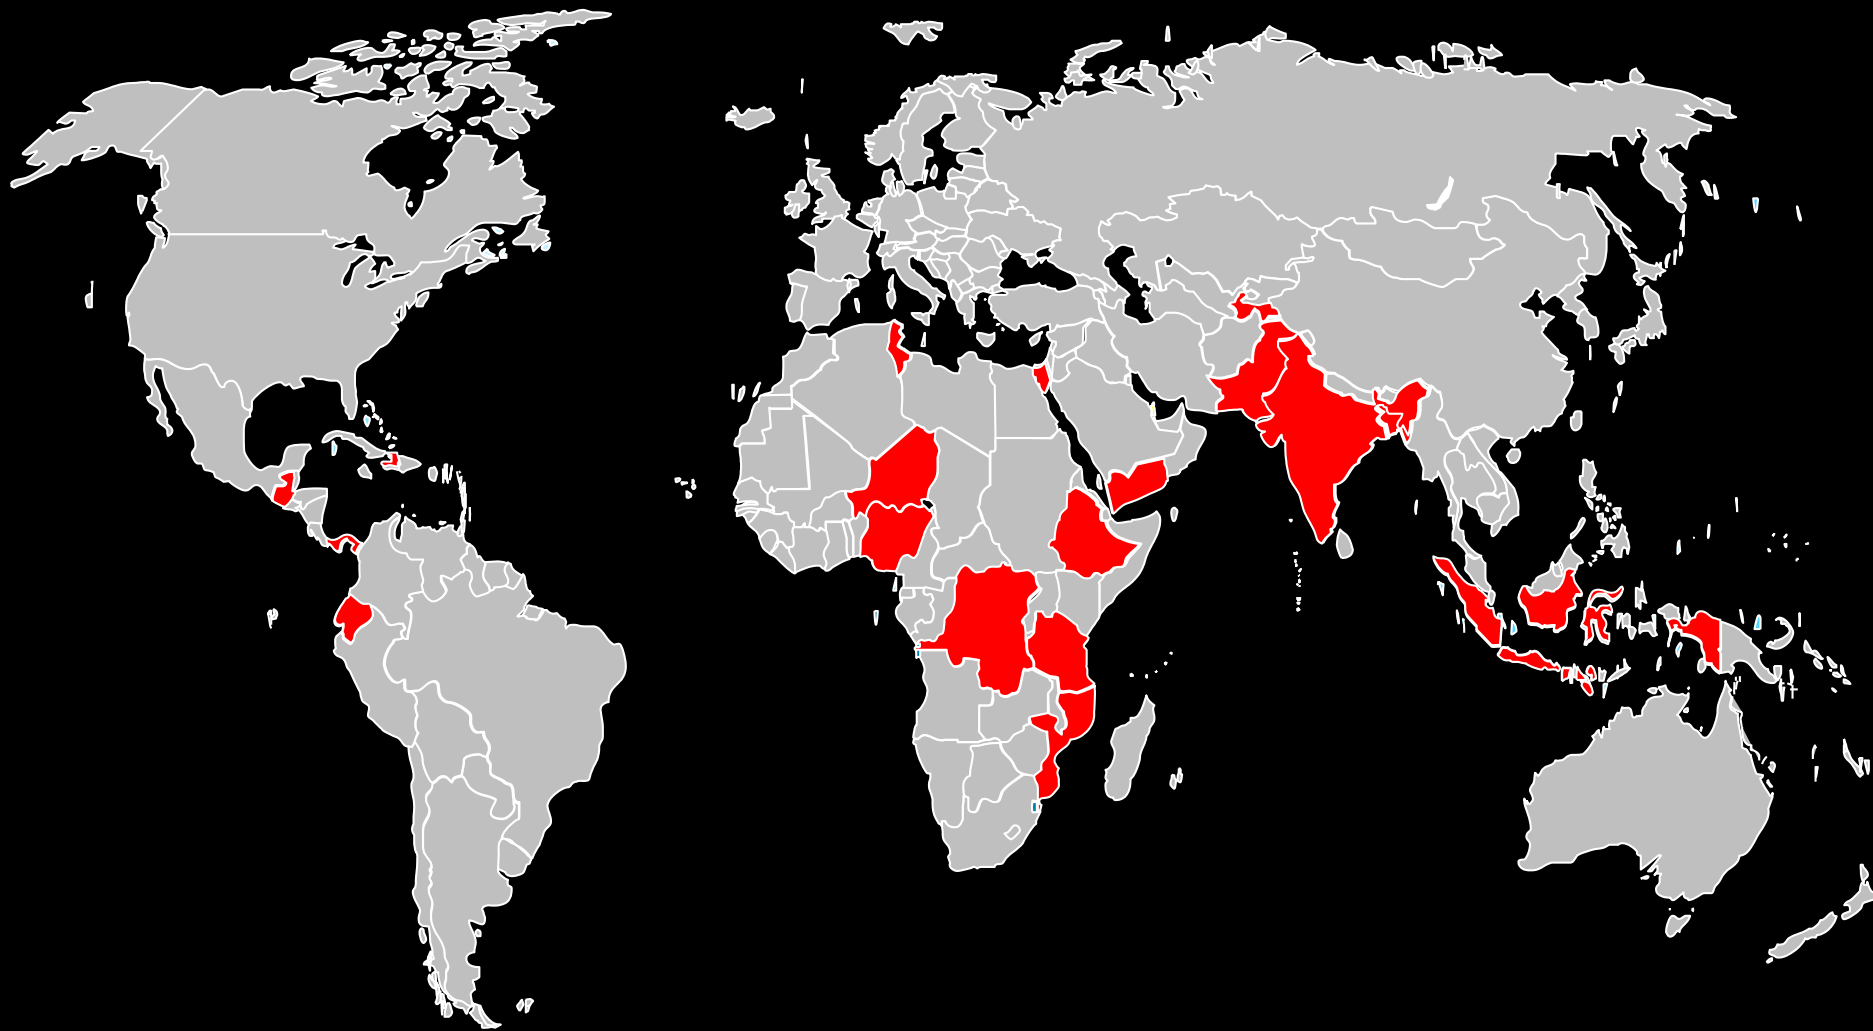

WASH Poverty Diagnostic Initiative

Stockholm, Sweden 2017

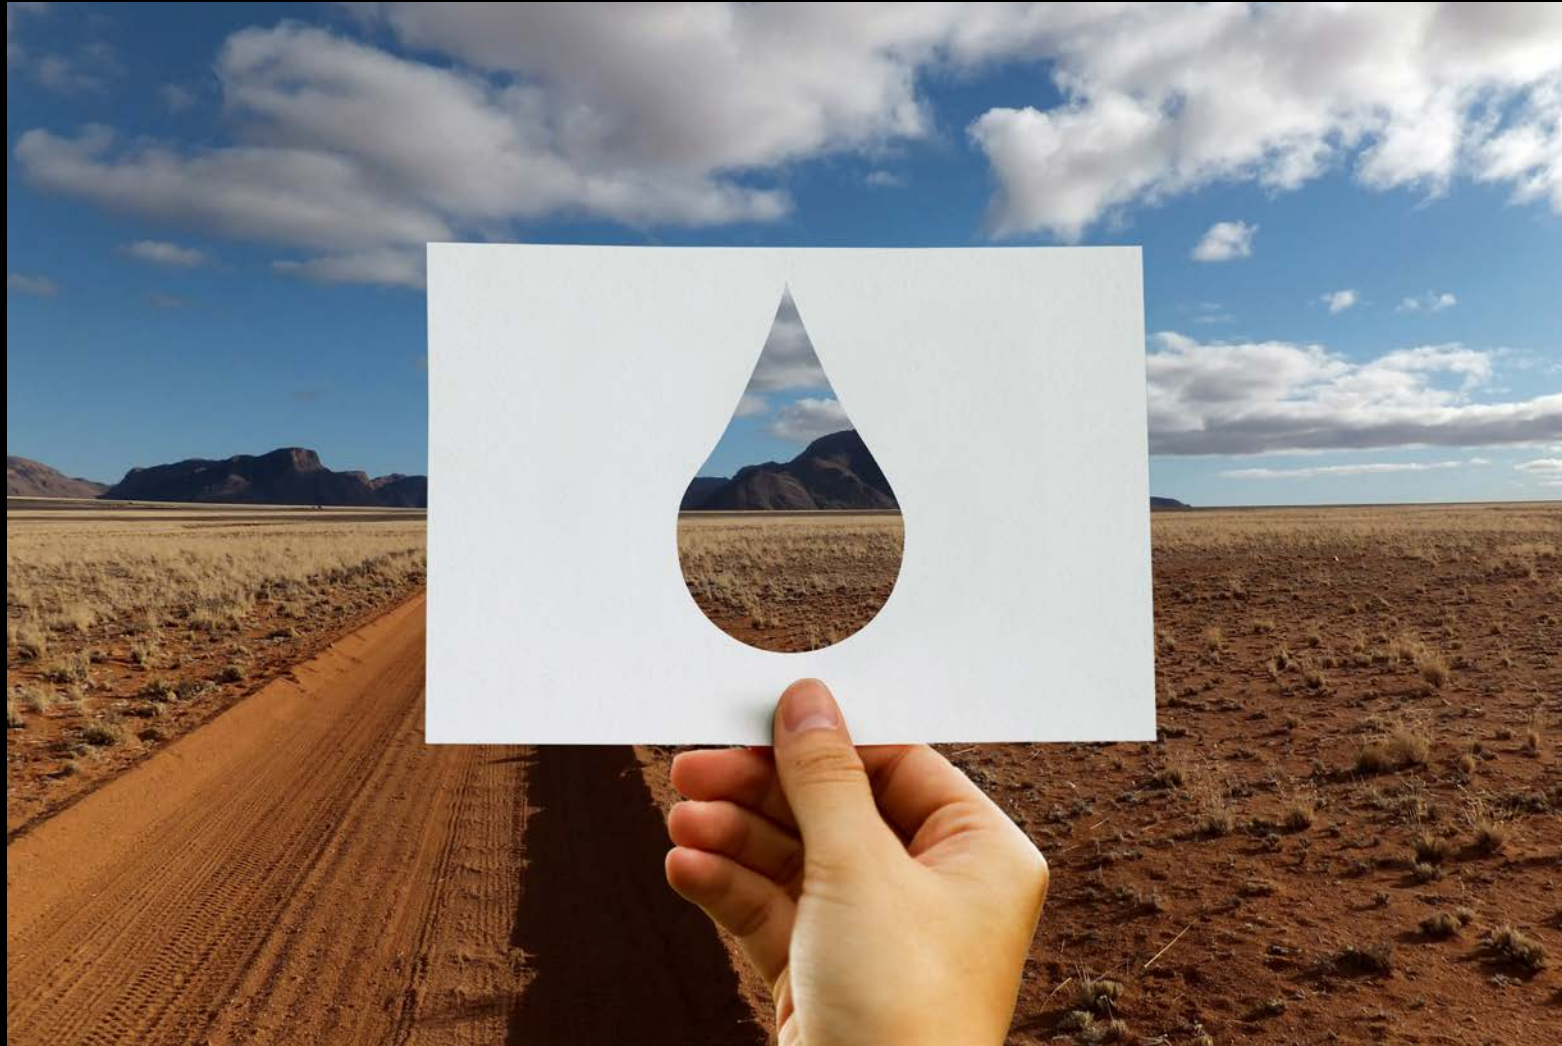

Think and Work Differently

Think and Work Differently

Think and Work Differently

What is the difference?

Piped water

Pond water

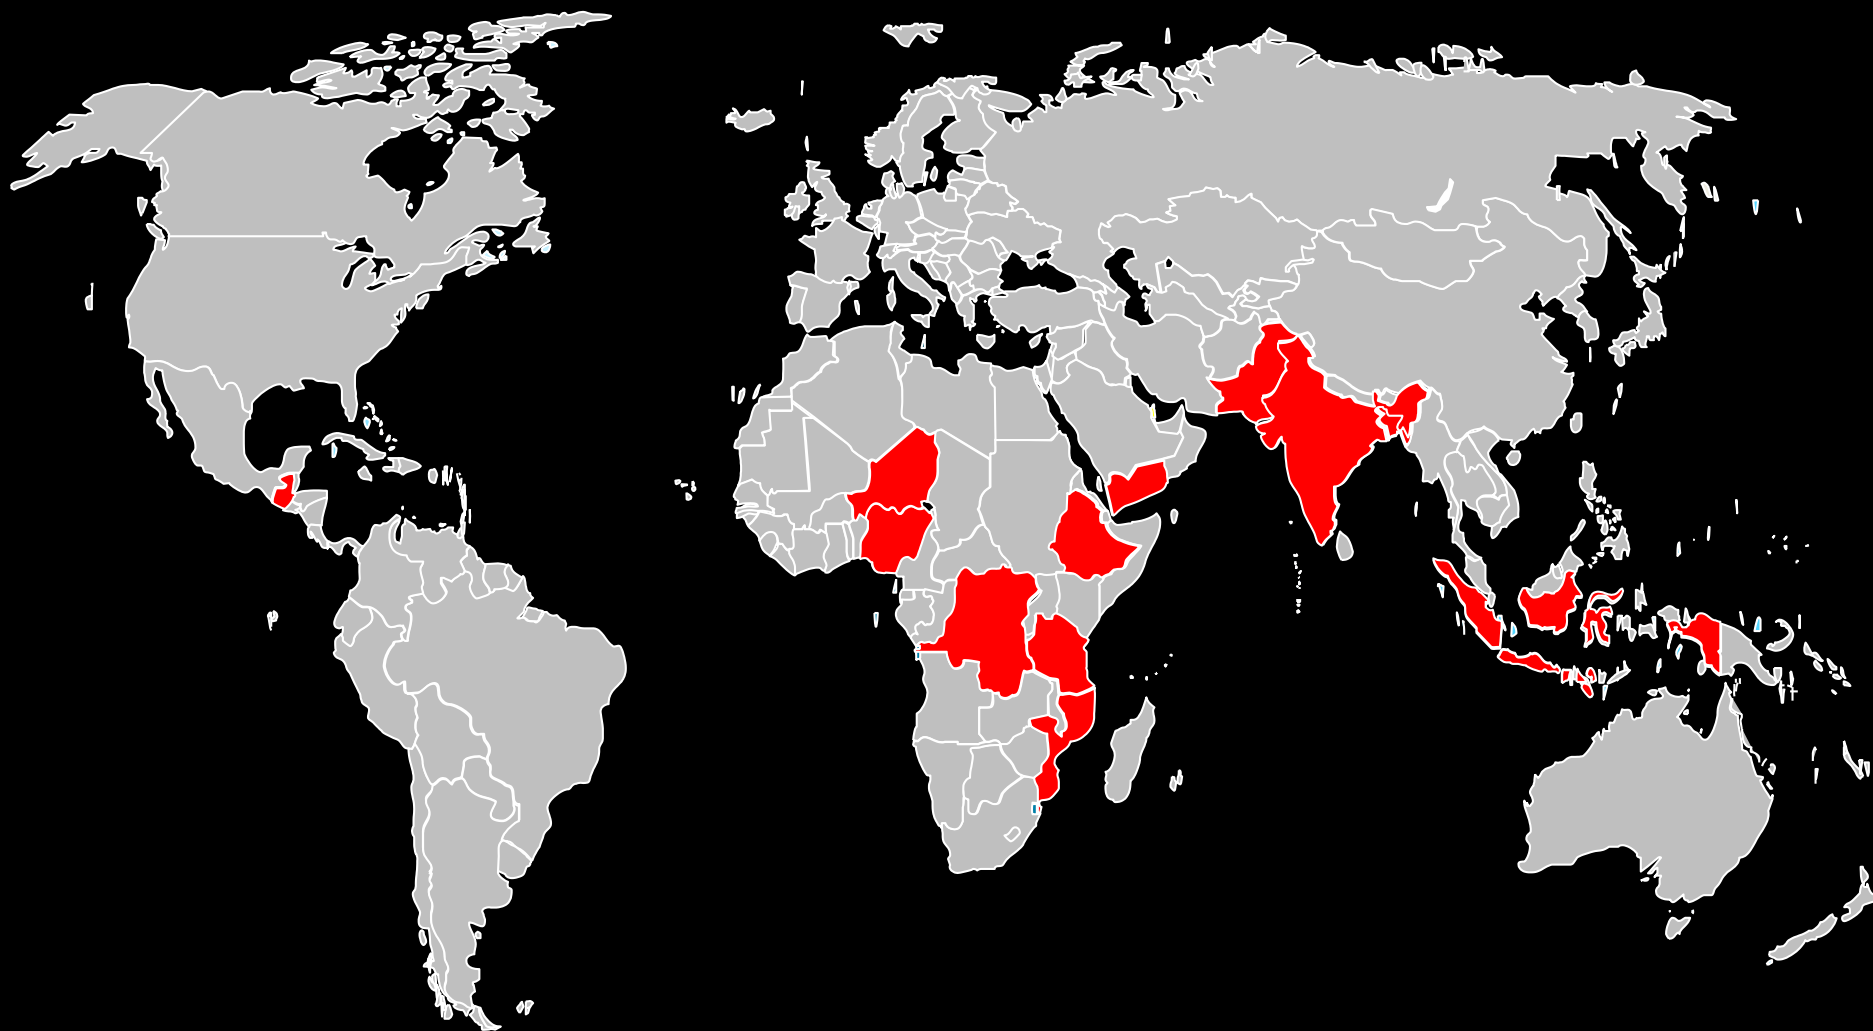

90 percent of rural water sources contaminated with E. coli

The poor have stunting rates 2 to 3 times higher than the rich

Over 30 percent of the children are stunted

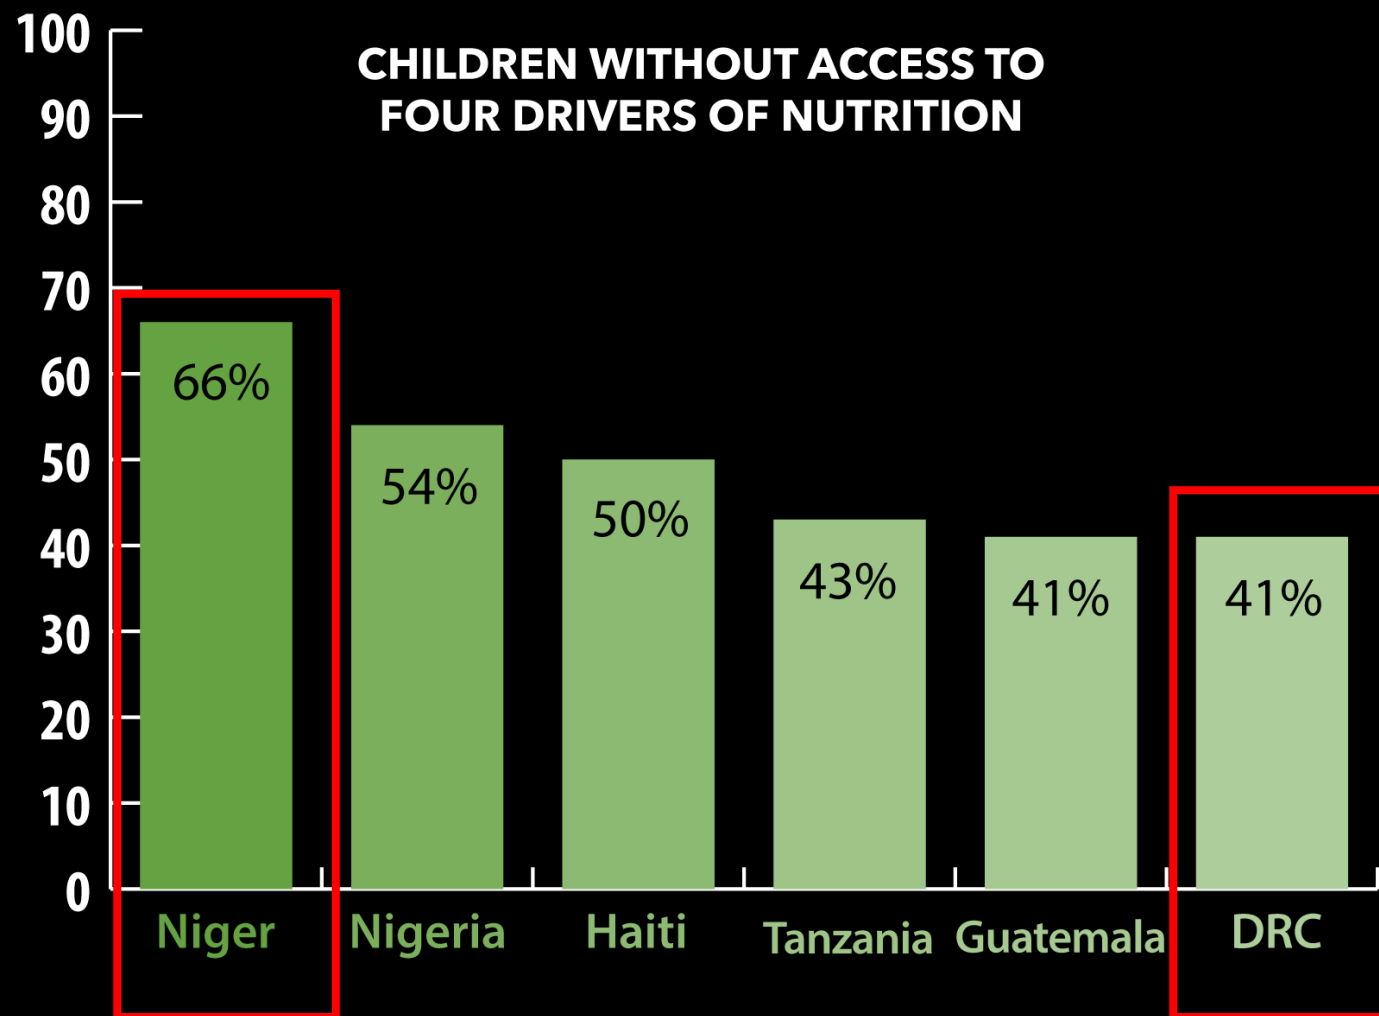

Stunting is powerful risk factor associated with 53 percent of infectious-disease-related deaths in developing countries

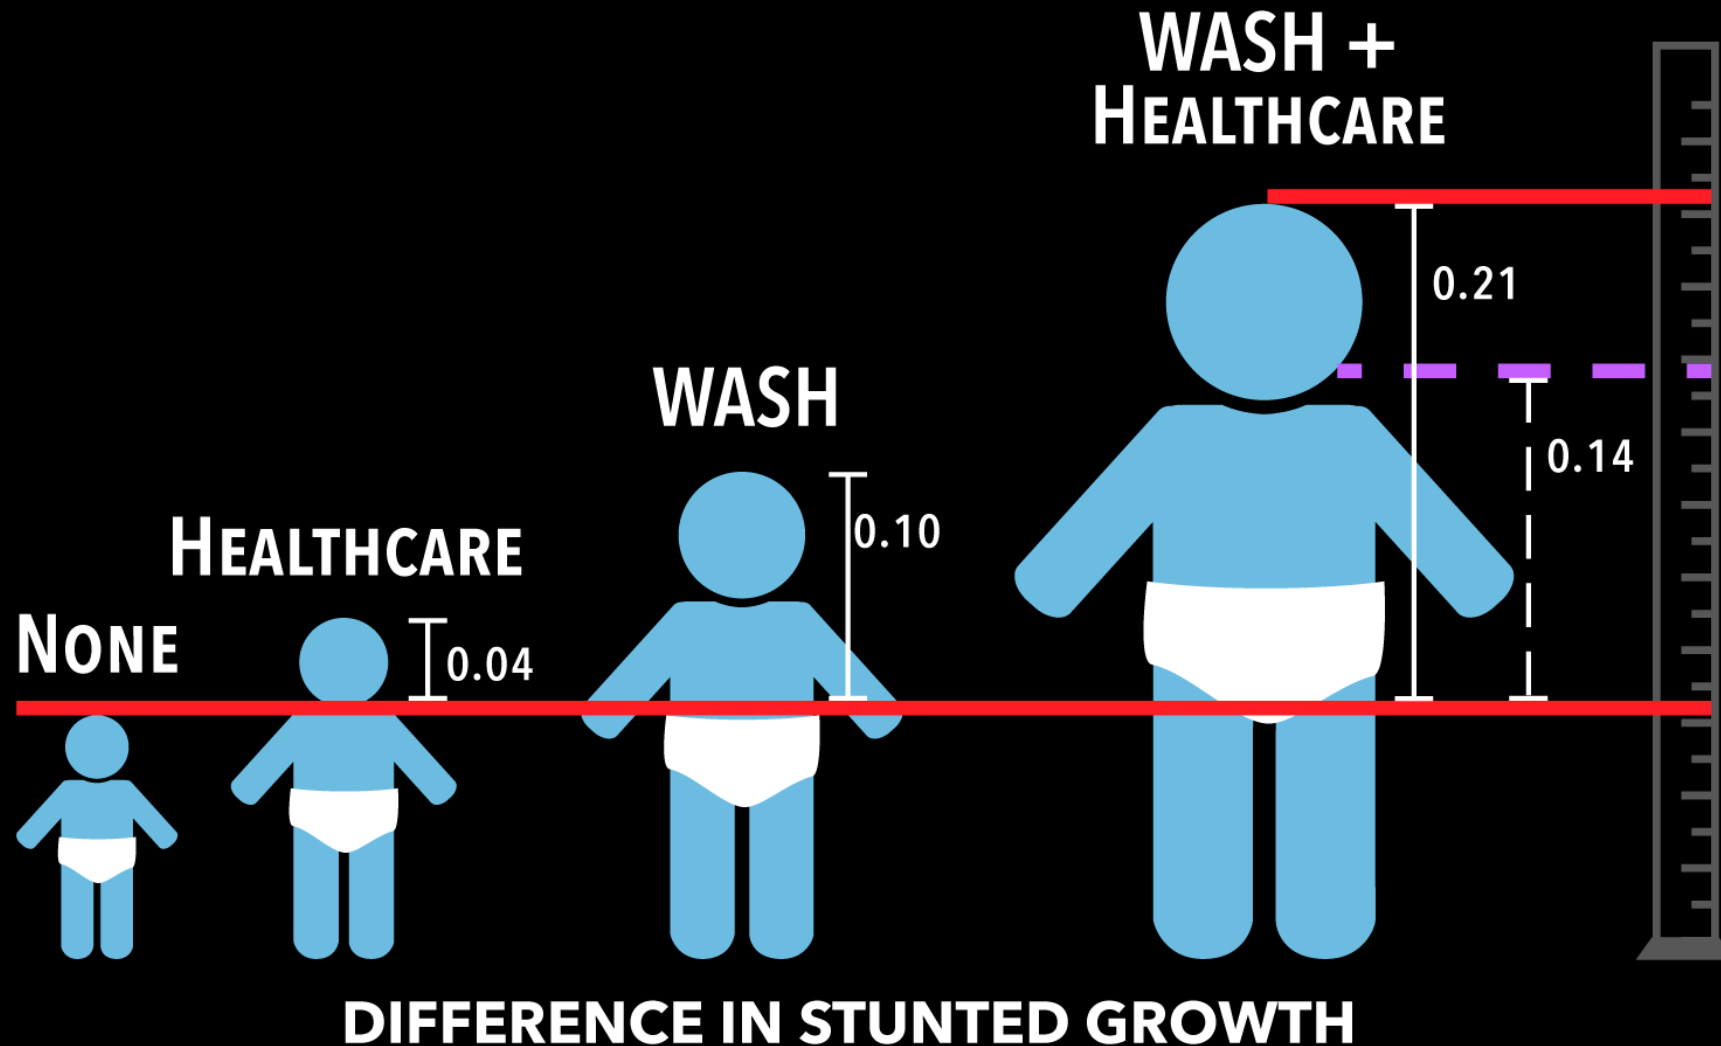

WASH is one of four factors of undernutrition

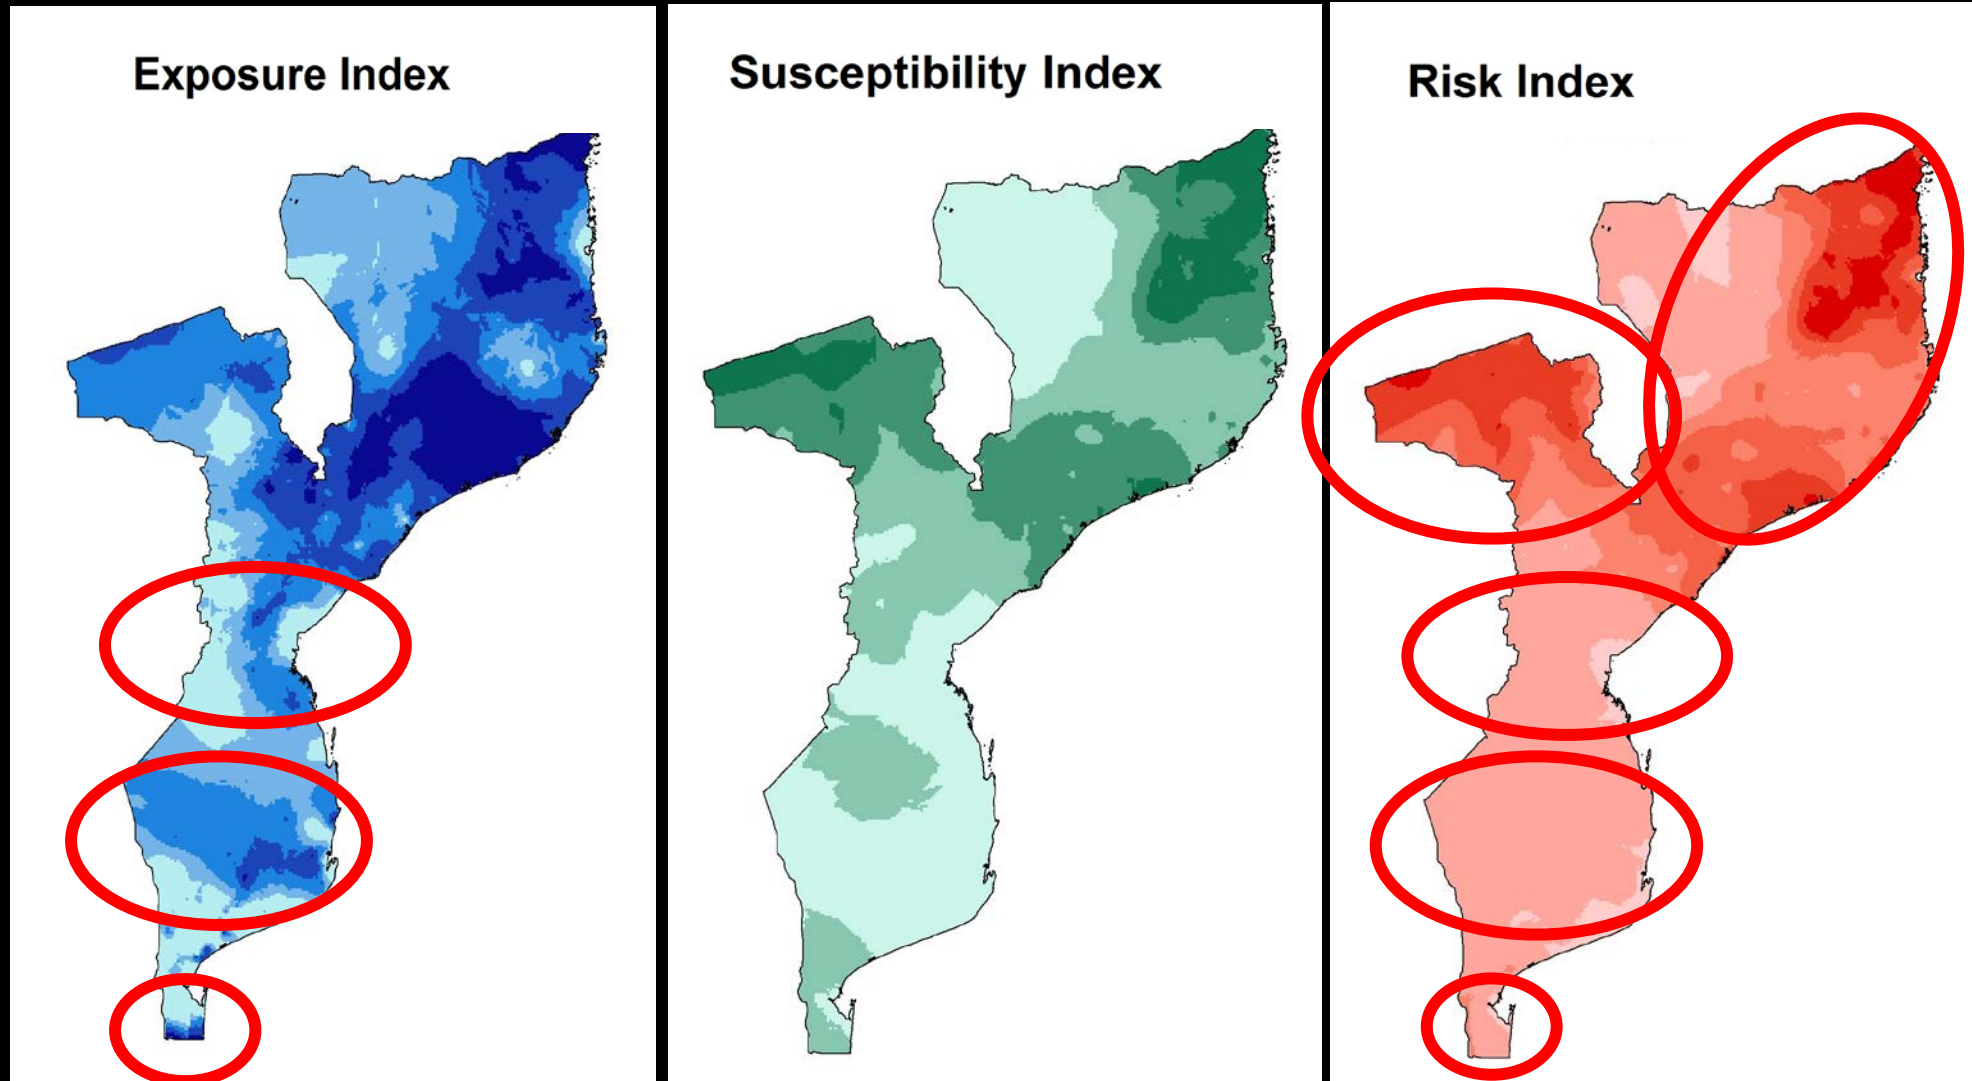

41 percent to 66 percent of children in these countries don't have adequate access to any of the four factors of nutrition

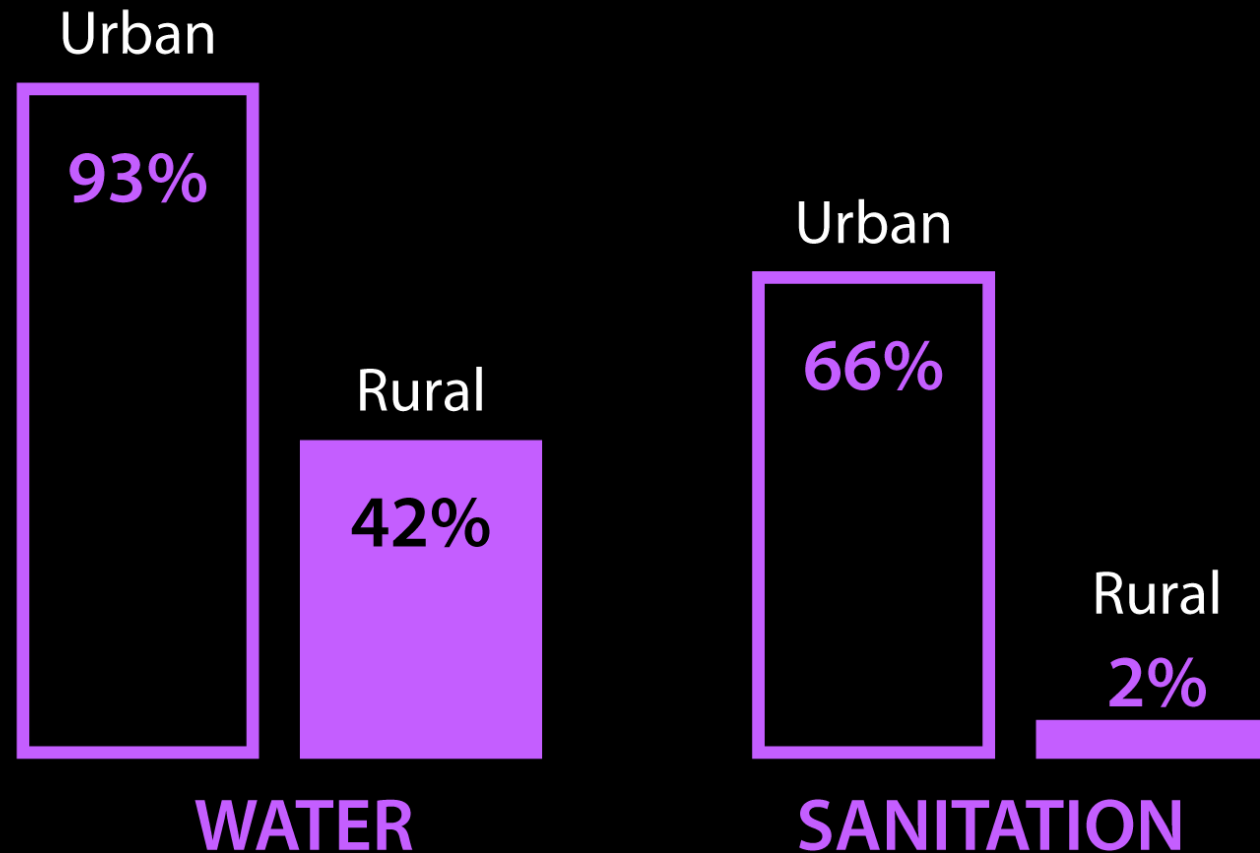

Interventions need to be coordinated across sectors to improve human development outcomes

Interventions need to be coordinated across sectors to improve human development outcomes

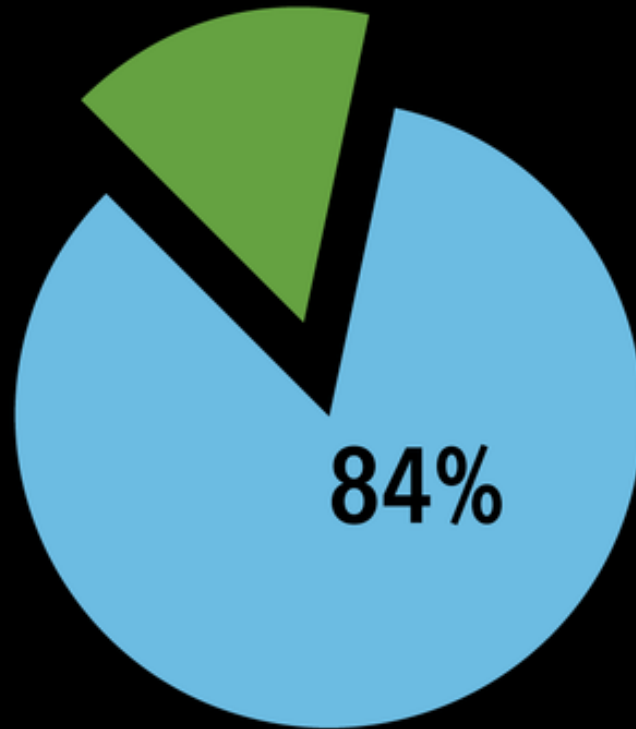

Investments need to be better targeted

NIGER POPULATION ACCESS

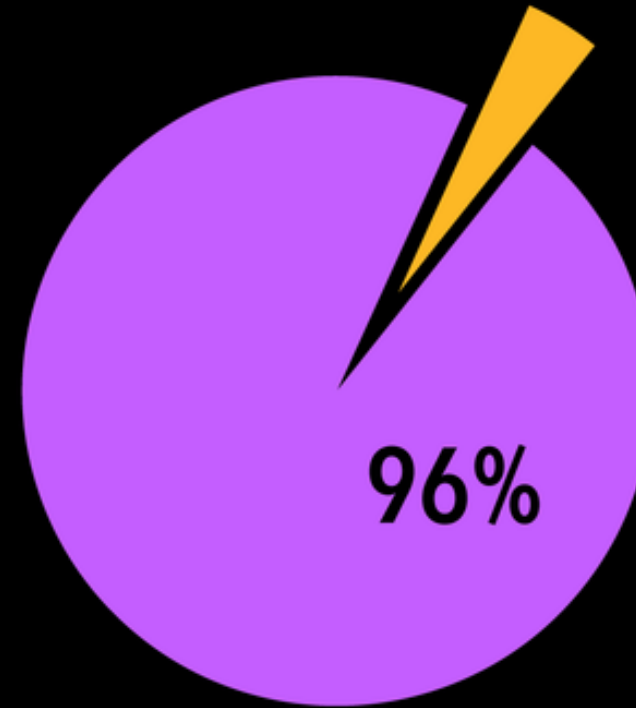

Investments need to be better targeted

NIGER POPULATION

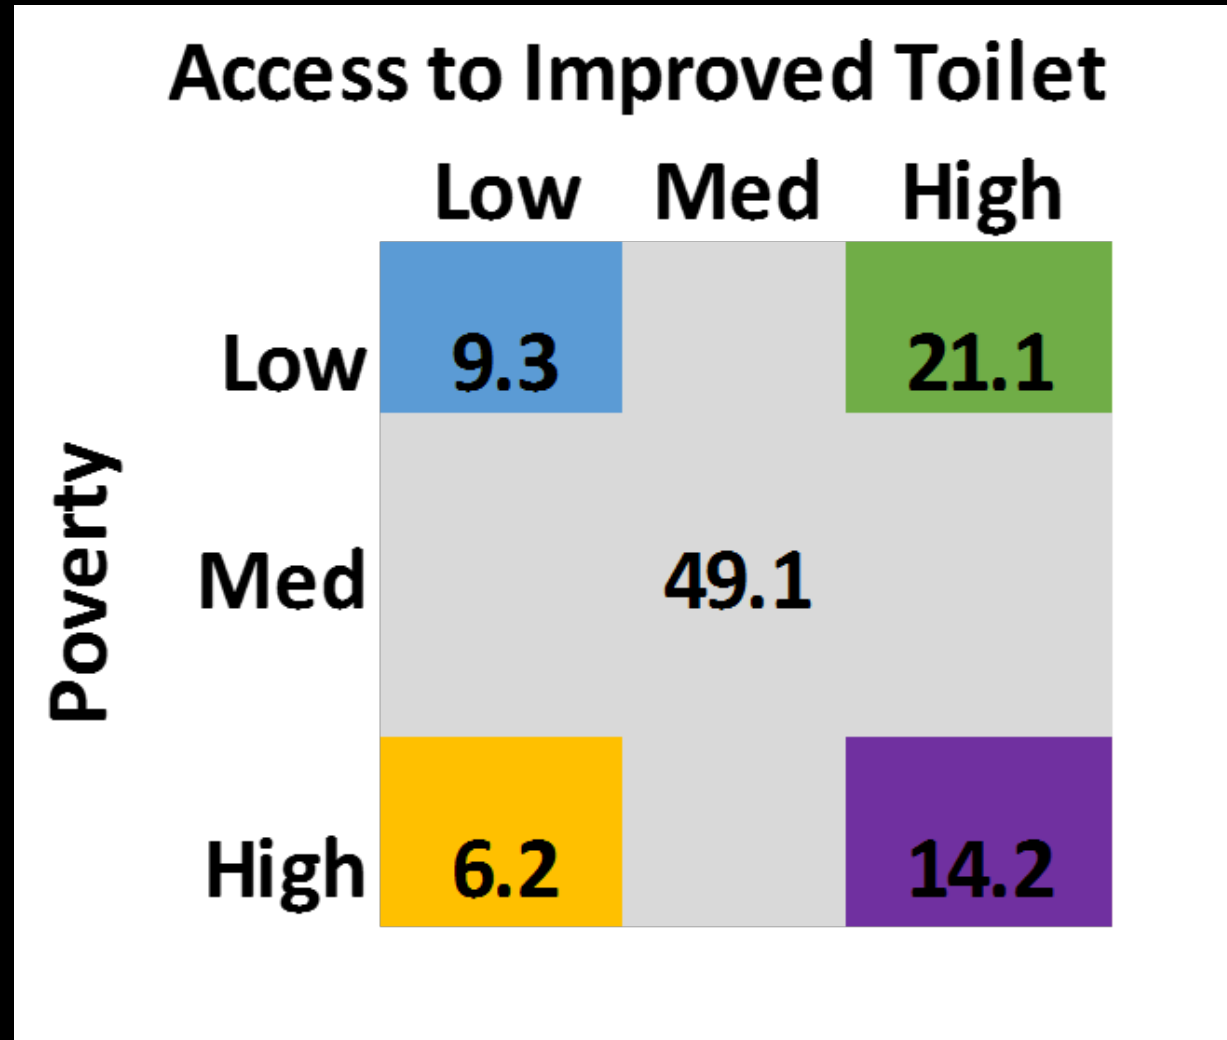

- Urban
- Rural

NIGER POOR

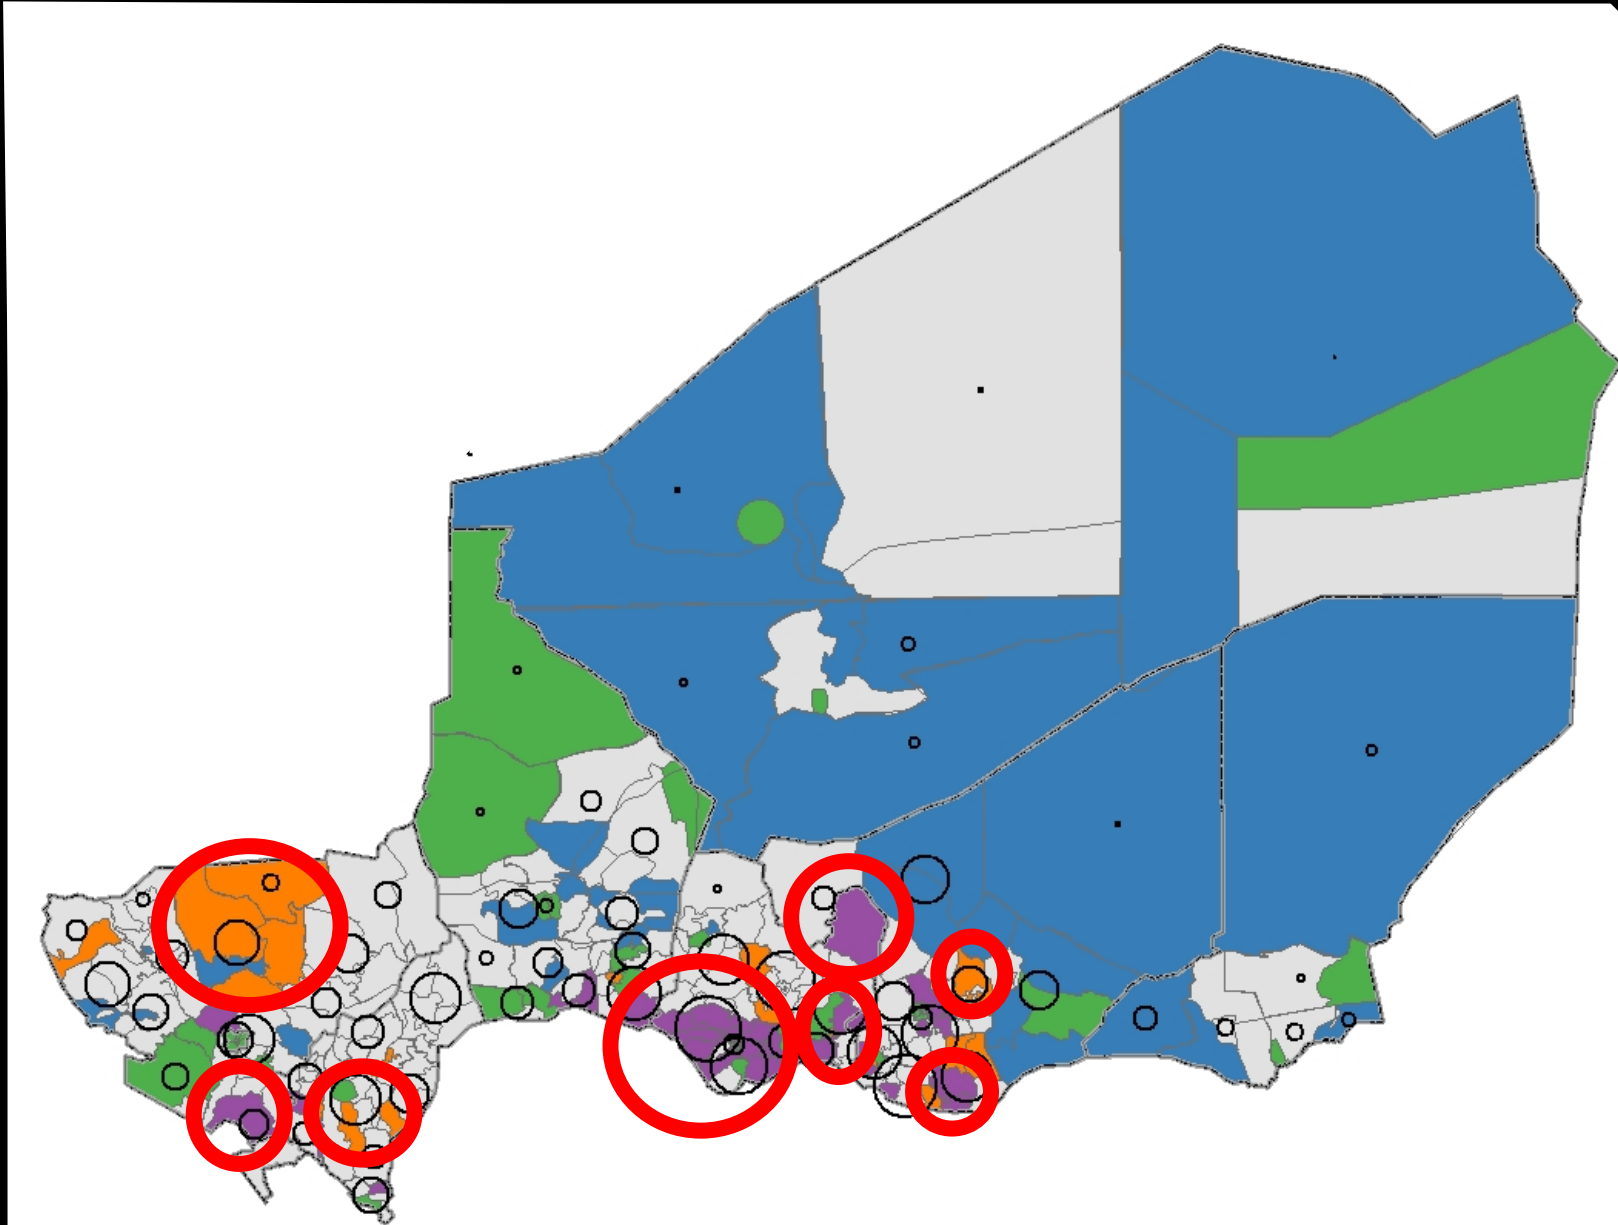

- Urban
- Rural

Investments need to be better targeted

Investments need to be better targeted

Thinking and Working Differently

Interventions need to be coordinated across sectors to improve human development outcomes

Investments need to be better targeted to reach the poor

Structured Discussion

- **Take one minute** by yourself to answer “**what questions and comments do I have based on what I heard?**”
- **Take 2 minutes** to discuss with a person next to you.

Thinking and Working Differently
