From data to decision: monitoring water
quality at scale

Tuesday 29 August | 11.00-12.30 | Room: FH 300

The SDGs and its indicators are well set up

Agree – disagree – neutral

In my daily work, I contribute to SDG monitoring

Agree – disagree – neutral

My work contributes to sustainable water management and WASH for the poor

Scale 1 (not at all) – 4 (totally)

SWWW is the place to be for changing the development sector

Scale 1 (not at all) – 4 (totally)

Data collection is key to improved WASH for all

Agree – disagree – neutral

Monitoring of water points is useless

Agree – disagree – neutral

SDG monitoring leads to improved water quality

Scale 1 (not at all) – 4 (totally)

Decisions are based upon data / information

Scale 1 (not at all) – 4 (totally)

Continuous water quality monitoring will be common practice within 5 years

Agree – disagree – neutral
