

# Sanitation and Health Panel Session

# *Water Security*

## Aims:

to publish papers that contribute to a better understanding of the economic, social, biophysical, technological, and institutional influencers of current and future global water security. At the same time the journal intends to stimulate debate, backed by science, with strong interdisciplinary connections. The goal is to publish concise and timely reviews and synthesis articles about research covering the following elements of water security:

- Shortage
- Flooding
- Governance
- Health and Sanitation
