

Coastal wetlands: what investments for what services?

Frank van Weert

MENA FOCUS - Benefits for Ecosystems and Wetlands through the Nexus

28 August 2018, 09h00-10h30, Room: FH 307

Outline

- **coastal wetlands**
- **biodiversity & ecosystem services**
- **wetlands & nexus**
- **investment for benefit**

Coastal wetlands

An aerial photograph of a coastal wetland, showing a dense network of winding water channels and marshes. The water is a mix of light blue and white, while the marshes are green and brown. The overall appearance is that of a complex, interconnected water system.

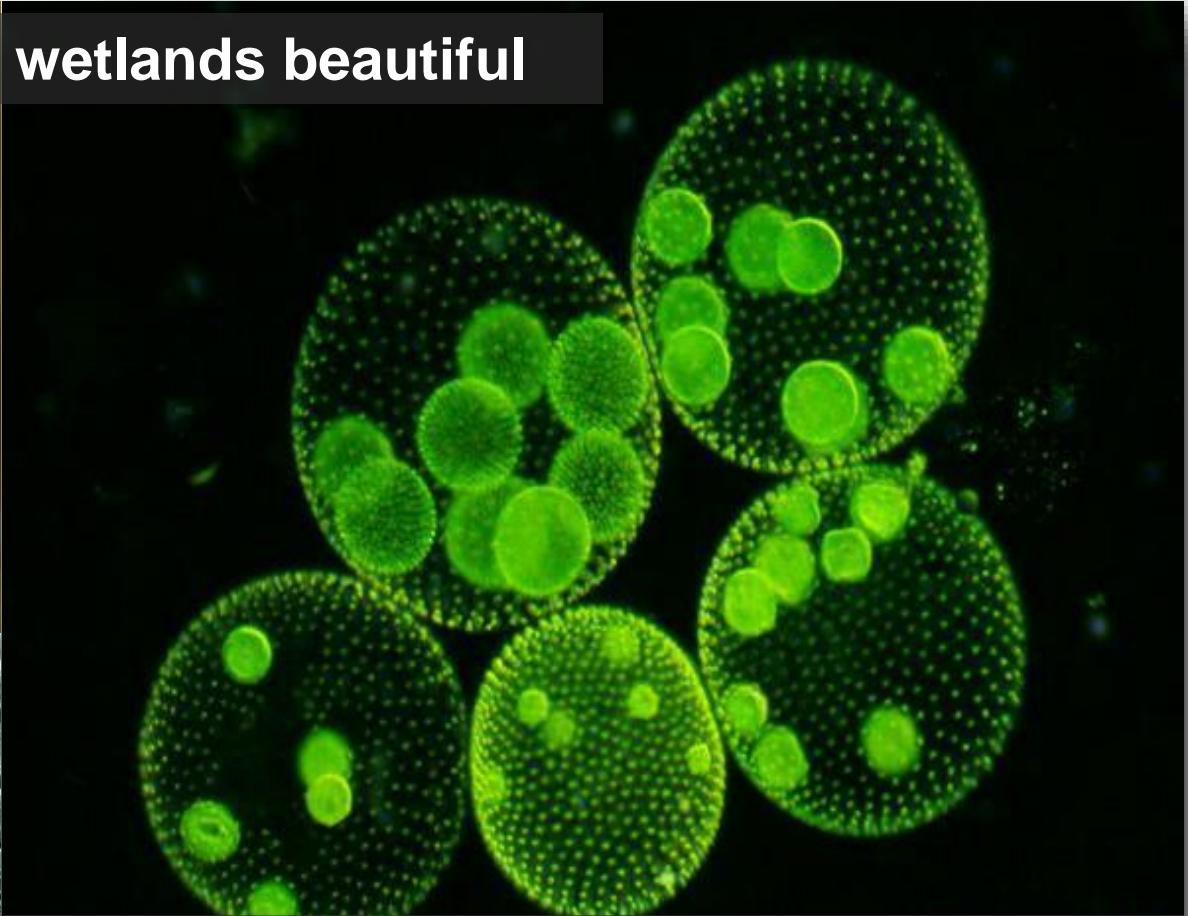

wetlands are areas of marsh, fen, peatland or water, whether natural or artificial, permanent or temporary, with water that is static or flowing, fresh, brackish or salt, including areas of marine water the depth of which at low tide does not exceed six metres

Coastal wetlands

Biodiversity & ecosystem services

Some species make wetlands beautiful

It is the diversity that makes wetlands healthy

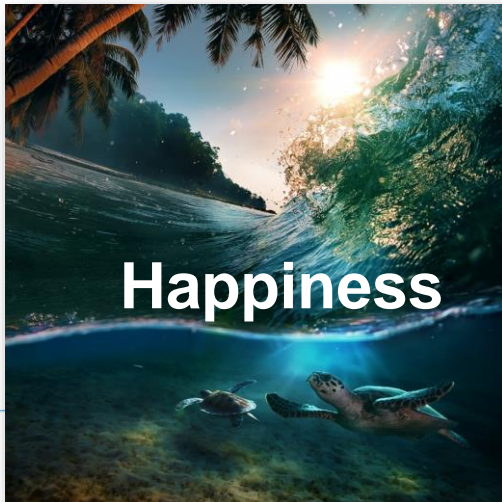

Biodiversity & ecosystem services

Ecosystem services are the many and varied benefits that humans freely gain from the natural environment and from properly-functioning ecosystems.

Recreational value

Happiness

Goods like food

Biodiversity & ecosystem services

Fish nurseries

Sea surge risk reduction

Benefits of mangrove systems

Biodiversity & ecosystem services

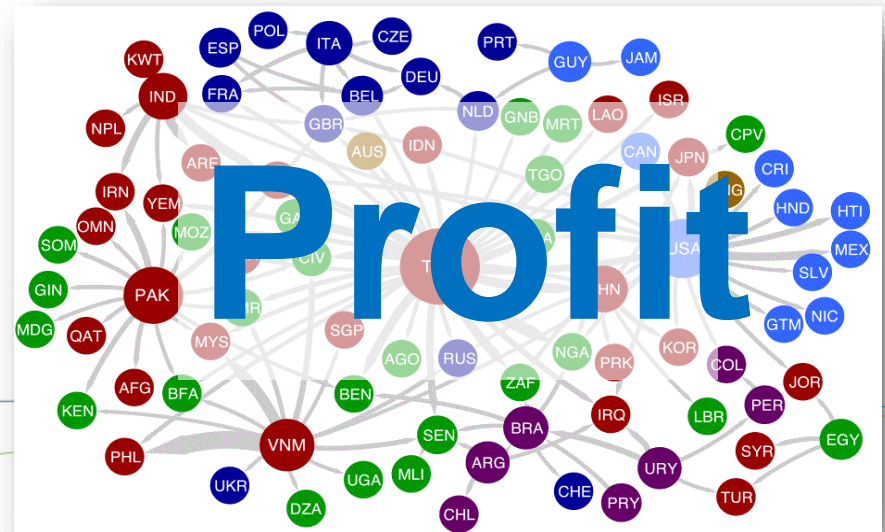

Carbon sequestration

Water purification

Benefits of freshwater wetlands like lakes and river floodplains

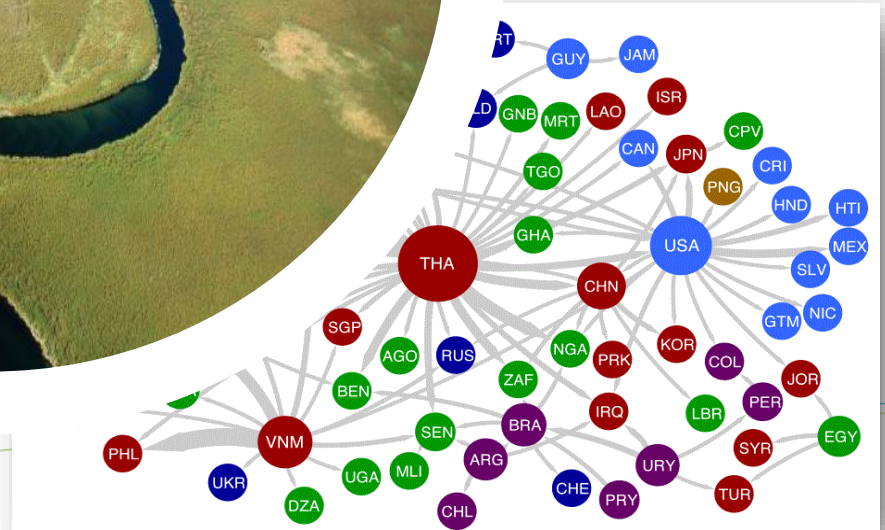

Wetlands & nexus

Wetlands & nexus

Investment for services

Thank you
