

BLENDED FINANCE for WATER INVESTMENTS

**Stockholm Water Week
29 August 2018**

Kathleen Dominique, OECD

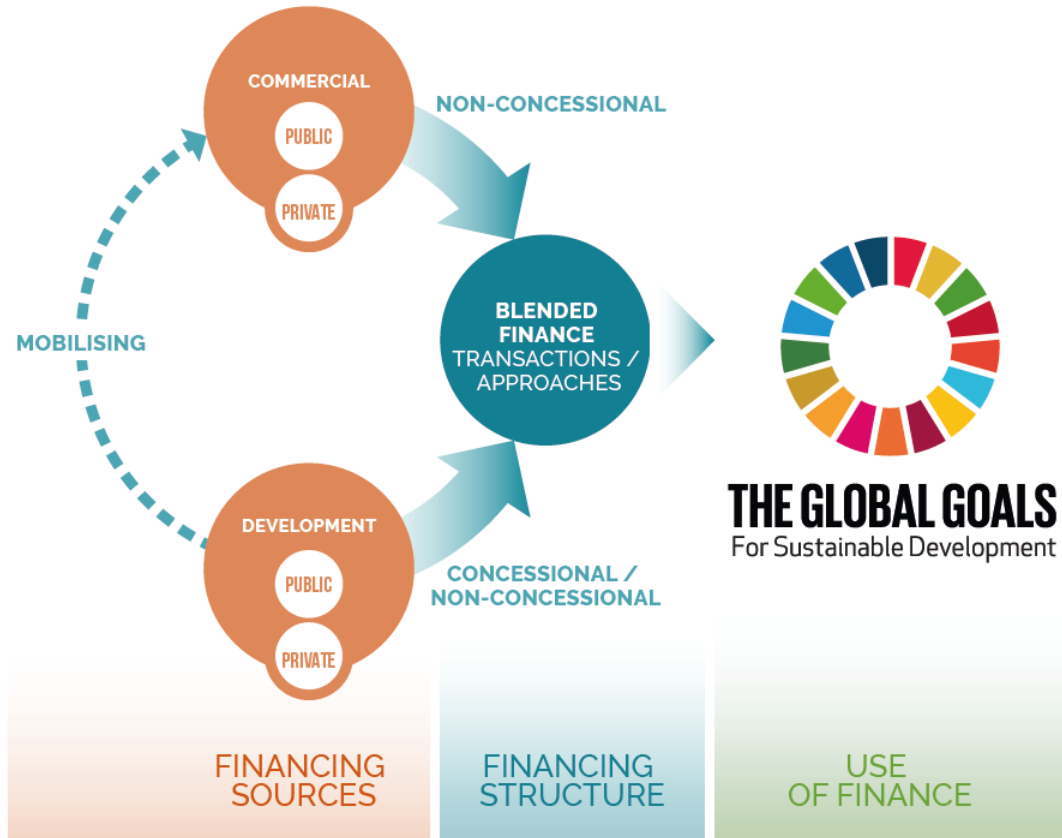

Official aid to water is reducing in relative terms

- While official aid has **increased overall**, the share of water as a percentage of all aid flows has **declined from 5% in 2005-06 to 4.5% in 2015-16**

Blended finance can help bridge the investment gap for the SDGs, but requires a common framework

What is blended finance?

Blended finance is the strategic use of **development finance** for the mobilisation of **additional finance** towards sustainable development in developing countries.

Sector-wise overview of blended finance

- A 2016 OECD Survey showed that, in 2012-15, **USD 81.1 billion was mobilised from the private sector** by official development finance interventions, however only **1.9% was for the water sector**

Case example: As-Samra Wastewater Treatment Plant, Jordan

- Expansion of WWT plant
- Millennium Challenge Corporation (MCC): advisory and viability gap funding of USD 93 million (grant) -> secured BOT contract
- Diverse blend of financing: USD 20 million grant from Government of Jordan; USD 110 million in private finance (loan syndication process)

Thank you
