

BLENDED FINANCE for WATER INVESTMENTS

**Stockholm Water Week
29 August 2018**

Paul Horrocks and Kathleen Dominique, OECD

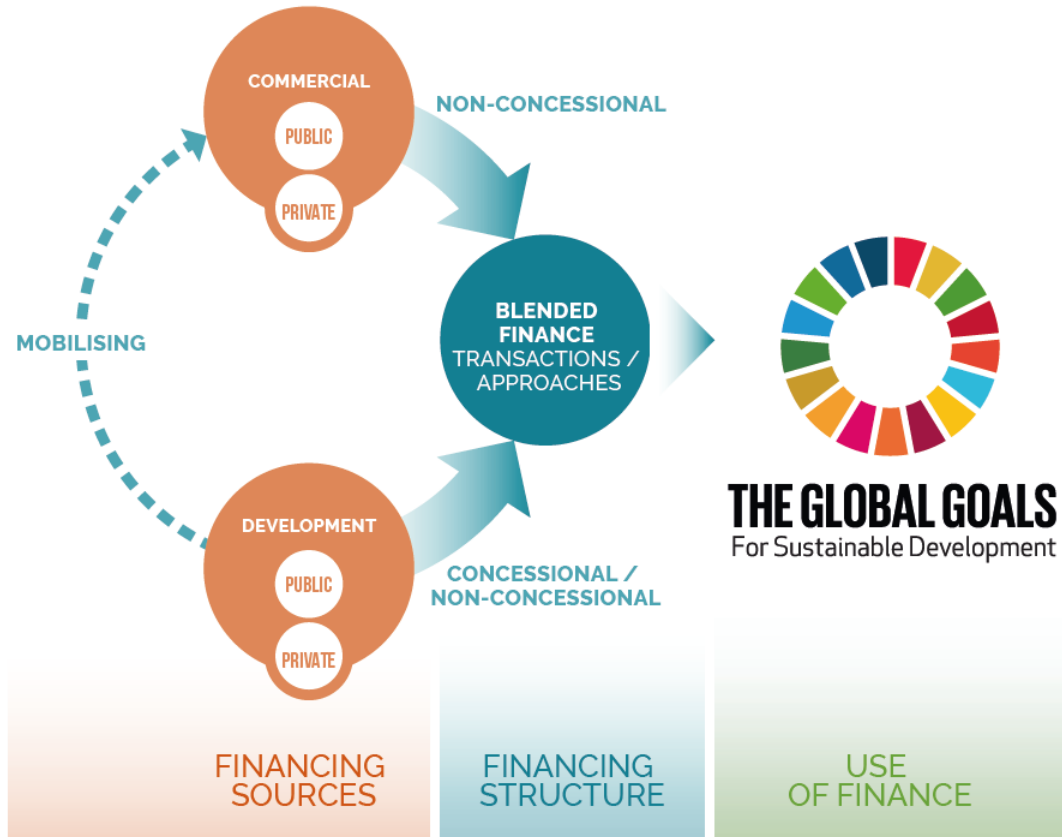

Official aid to water is reducing in relative terms

- While official aid has **increased overall**, the share of water as a percentage of all aid flows has **declined from 5% in 2005-06 to 4.5% in 2015-16**

Blended finance can help bridge the investment gap for the SDGs, but requires a common framework

What is blended finance?

Blended finance is the strategic use of **development finance** for the mobilisation of **additional finance** towards sustainable development in developing countries.

Sector-wise overview of blended finance

- A 2016 OECD Survey showed that, in 2012-15, **USD 81.1 billion was mobilised from the private sector** by official development finance interventions, however only **1.9% was for the water sector**

OECD DAC Blended Finance Principles present a blueprint for better blending

PRINCIPLE 1 : ANCHOR BLENDED FINANCE USE TO A DEVELOPMENT RATIONALE

PRINCIPLE 2 : DESIGN BLENDED FINANCE TO INCREASE THE MOBILISATION OF COMMERCIAL FINANCE

PRINCIPLE 3 : TAILOR BLENDED FINANCE TO LOCAL CONTEXT

PRINCIPLE 4 : FOCUS ON EFFECTIVE PARTNERING FOR BLENDED FINANCE

PRINCIPLE 5 : MONITOR BLENDED FINANCE FOR TRANSPARENCY AND RESULTS

A spectrum of water-related investments

- Sub-sectors vary considerably in terms of their potential to generate cash flows and attract commercial finance

Attributes of investments that influence their suitability for blended finance

Risks	Returns	Project Attributes
Macroeconomic and business risks	Cash-flow generation	Greenfield vs. brownfield
Regulatory and political risks	Developmental return	Scalability
Technical risks		Size
Environmental/social risks		Transaction costs
		Tenor/Longevity

- Does the investment support development objectives?
- Can the risk-return profile of the investment be designed to attract commercial finance?

Thank you
