

**Sustainable Health in Procurement Project
(SHiPP)** SIWI Show case meeting
Stockholm 27th August 2018

Supported by

Sustainable Health in Procurement Project (SHiPP)

*Reducing harm to people and the environment caused by the manufacture and disposal
of medical products*

&

*Synergies with the SIWI/UNDP Reducing Emissions from Antibiotics Production (REAP)
project.*

Dr. Rosemary Kumwenda

UNDP Regional Team Leader – HHD & Coordinator – UN SPHS Secretariat

Presentation Outline

Supported by

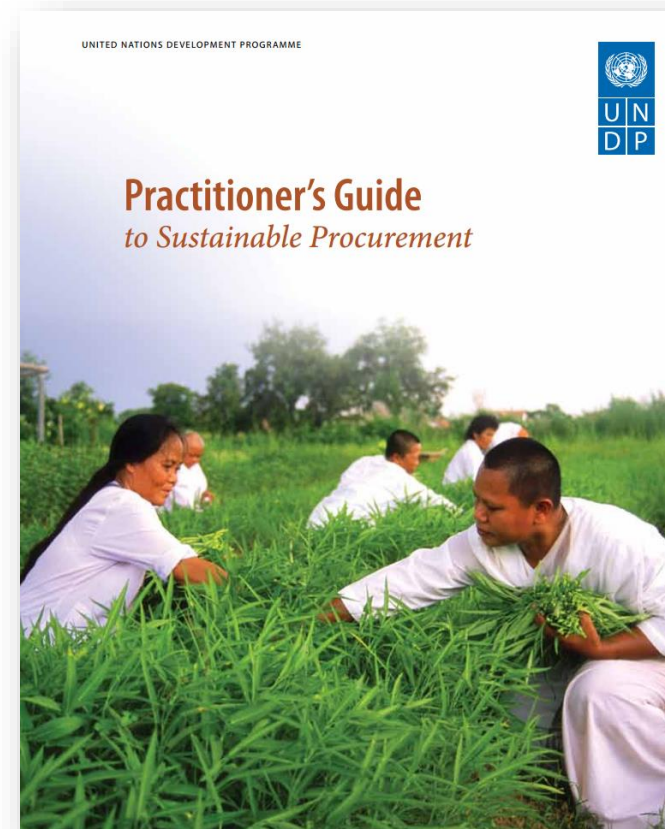

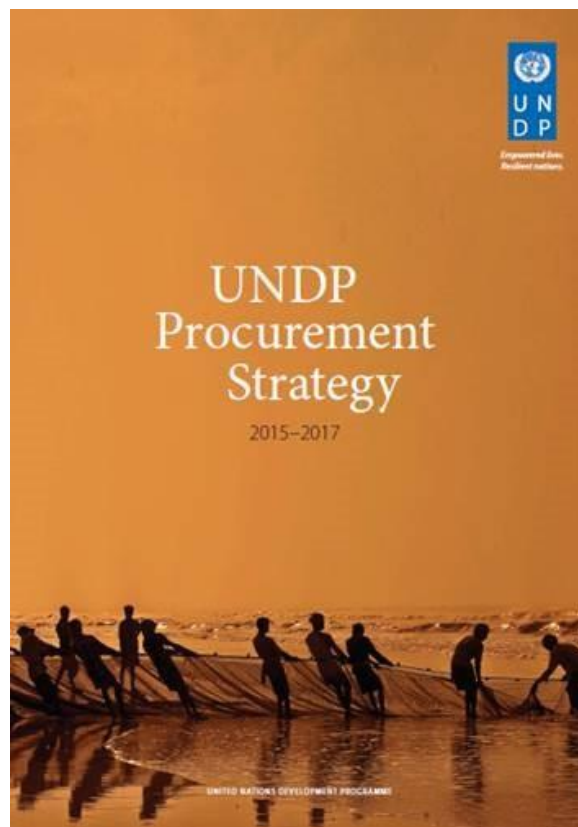

1. **SDGs** and UNDP Strategic Plan
2. **UNDP Procurement Policies** and Strategies
3. **SPHS**: Who we are and what we do
4. **SHiPP 2018-2021**: What we aim to achieve
5. **REAP reflections**: India Baseline findings
6. Entry points for **Sustainability – Policy makers**
7. Entry points for **Sustainability – Procurers**
8. Entry points for **Sustainability – Suppliers and manufacturers**
9. **Key takeaways**

1. **SDGs** and UNDP Strategic Plan

- **SDG's Agenda: 17 Goals, 169 targets to be met in 2030**; and collaborating with UN Agencies, national governments, private sector and also civil society to end poverty, reduce inequalities, build peaceful inclusive and resilient societies.
 - SDG 3 Good Health and Well Being
 - SDG 5 Gender Equality
 - **SDG6** Clean water and sanitation (SIWI)
 - SDG 7 Affordable and Clean Energy
 - SDG 8 Decent Work and Economic Growth
 - SDG 11 Sustainable Cities and Communities
 - SDG 12 Responsible Consumption and Production
 - SDG 13 Climate Action
 - SDG 16 Peace, Justice and Strong Institutions.
- UNDP Corporate **Strategic Plan 2018-2021**.
- UNDP's **HIV, Health and Development Strategy Note (2016-2021)** Connecting the Dots under Action Area 3: Building sustainable and resilient systems for health.

2. UNDP Procurement Policies and Strategies

3. **SPHS:** Who we are and what we do

Supported by

Establishment: May 2012 in Copenhagen, Denmark

Hosted: from January 2015, UNDP Istanbul Regional Hub, Turkey

Members: seven UN Agencies and three Multilateral Health Financing Institutions.

Vision: Promote sustainable procurement of health commodities and to contribute to greener health systems

Leverage: Annual cumulative purchase power of **US\$5 billion** in the global health sector

Aim: Reduce environmental and social impact of the health sector, and improve human health and well-being

4. SHiPP 2018-2021: What we aim to achieve

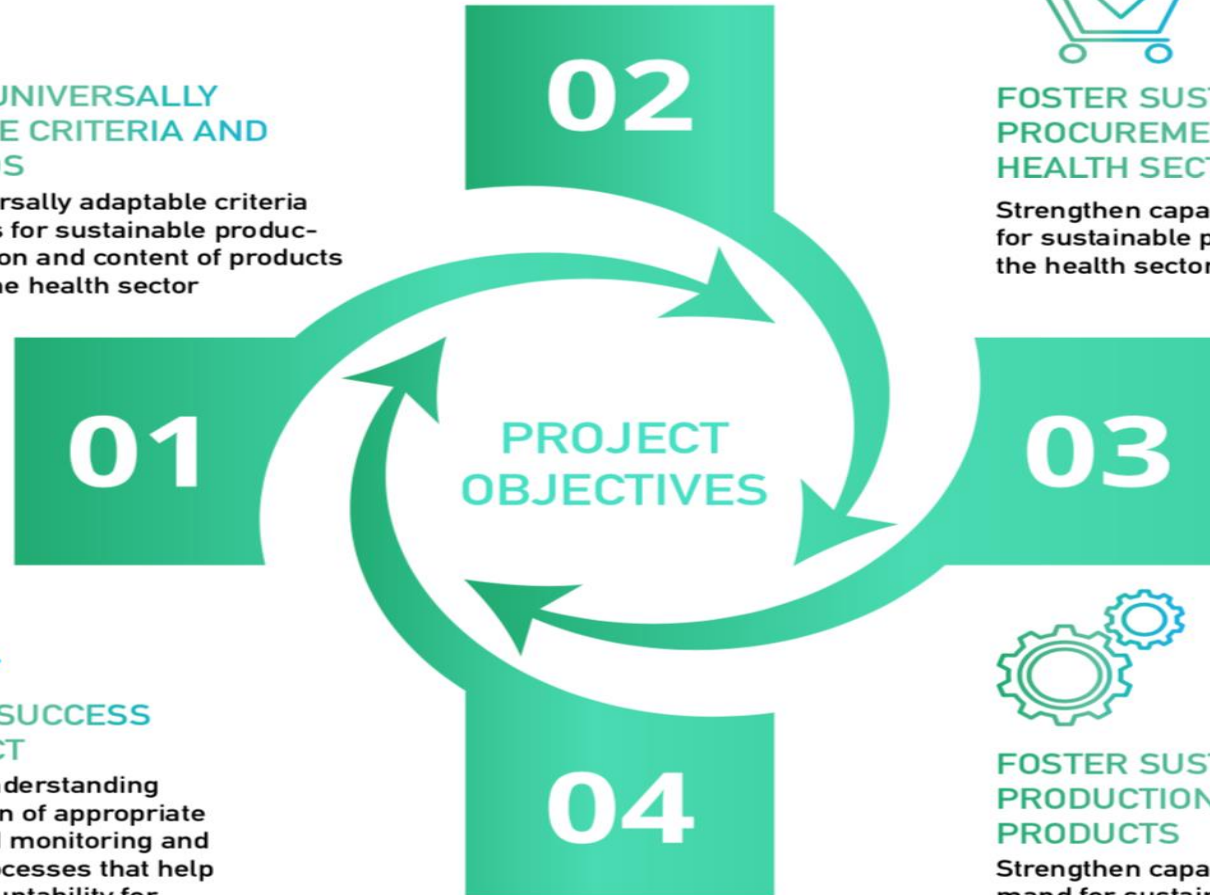

DEVELOP UNIVERSALLY ADAPTABLE CRITERIA AND STANDARDS

Develop universally adaptable criteria and standards for sustainable production, distribution and content of products procured by the health sector

FOSTER SUSTAINABLE PROCUREMENT IN THE HEALTH SECTOR

Strengthen capacity and demand for sustainable procurement in the health sector

MEASURE SUCCESS AND IMPACT

Strengthen understanding and application of appropriate indicators and monitoring and evaluation processes that help promote accountability for sustainable procurement in the health sector

FOSTER SUSTAINABLE PRODUCTION OF HEALTH PRODUCTS

Strengthen capacity and demand for sustainable production, supply and disposal of health care products

5. **India:** Baseline findings and reflections on REAP

- **SHiPP (UNDP/SPHS/HCWH)** and **SIWI (UNDP/SPHS)** project Country
- **India:** overall second largest supplier to the UN System BUT is **largest health commodities** supplier to the UN. 94% of the UN's total health procurement: pharmaceuticals
- 2017 more than 5,000 institutions launched the First (HELP) Health and Environmental Leadership Platform (HCWH-led)
- **India's Made In India Policy**, issued in June, 2017 can provide opportunities to promote 'green'/Sustainable manufacturing of health commodities and supplies and was recommended be incorporated in the SHiPP strategy.

	Basel (EIF)	Rotterdam (EIF)	Stockholm	Montreal (EIF)	Minamata (Ratifications)	Paris (Ratifications)
India	1992	2005	2006	Yes	2018	2016

6. Entry points for Sustainability – **Policy makers**

- *Develop **Sustainable Public Procurement Policy** + for the Health Sector; with UNEP's the 10-Year Framework Programme on Sustainable Public Procurement (SPP)*
- ***Healthcare Procurement and the Compliance with International Environmental Conventions on Chemicals:** UNDP tool provides visual feedback and presents list of products and total volume of procurement that do not comply with the International Conventions. Provides compliance scan and dashboard which can be used as a baseline/benchmark against which suppliers and manufacturers can measure their sustainability progress or the lack of it.*

7. Entry points for Sustainability – Procurers

- *Improve knowledge on SPP; SPHS Capacity-development for low-carbon procurement/ sustainable health procurement for key stakeholders in the health sector*
- *Procurement analysis of top health commodities procured by the MoH; Identify toxic chemicals using the UNDP-HCWH List of Chemicals of Concern and propose safer alternatives.*
- *Additional opportunities: Carbon Foot-printing of Health Programmes, Environmental Safeguarding, **waste water** and Healthcare Waste Management*

8. Entry points for Sustainability – Suppliers and manufacturers

Supported by

- 
- *Environmental and social assessment of suppliers and manufacturers of health commodities: In **tendering step**: opportunity to introduce UNDP-HCWH Environmental Questionnaire for Suppliers and Manufacturers of Health Commodities; Tool proposes gradual approach to implement sustainability technical specifications, in partnership with manufacturers, to transition from mere policy commitment to action.*
 - *In the **contract execution and delivery step**: focus on *engagement between suppliers/ manufacturers and procurers on sustainable production and procurement of health commodities*; offer capacity development sessions and sharing good practice examples on sustainable production*

The vision is that **procurers and suppliers and manufacturers of health commodities, act as drivers of change**, working towards sustainability, by embracing sustainable procurement/manufacturing practices and recognizing them as central to their future competitiveness.

9. Key **takeaways**

- **Sustainability is our collective responsibility and present** (no longer an anticipated future): **SDG12**: Sustainable consumption and production cannot be separated from each other and from other SDGs in the discussion of sustainable development
- **Share and scale-up**: Companies operating in the health sector, due to their scale and impact, need to increase engagement and demand for transparency, as this will be central to their future competitiveness.
- **Join the global community and Save Lives Sustainably**: This endeavor is multifaceted and broad such that it entails the cooperation of more than one industry or sector, and requires sectors to work jointly to meet desired goals and ensure success of initiatives *to protect **People**, the **Planet**, ensure **Prosperity**, **Peace** and strong **Partnerships**.*

Thank you..

We look forward to working with you on a more sustainable global health sector.
