The United Nations World Water Assessment Programme presents:

GENDER AND WATER DATA

PROJECT FOR GENDER SENSITIVE WATER MONITORING, ASSESSMENT AND REPORTING

Francesca Greco
#waterandgender
Gender and Water Focal Point
UN WWAP UNESCO

2014:WWAP promotes a gender-transformative project on water monitoring assessment and reporting

- the call for sex-disaggregated data was not only coming from UNESCO DG but also from other UN agencies and from the international development community as a whole
- WWAP took this call as part of its mission: providing tools for global water monitoring, assessment and reporting
- In particular, the project aims at promoting the political inclusion and participation of women in water-related decision making and knowledge production

THE PROJECT : PHASES, TESTING, OUTPUTS

PHASE I – ENDED

Production of the Toolkit for gender sensitive water monitoring (2014 – 2015)

PHASE II - Pilot projects in the field (2015- 2016)

PHASE III: Validation of results and Dissemination (2016 – 2017)

PHASE IV: Capacity development (from July 2017)

**Donors'
strategy
and
partnership
building**

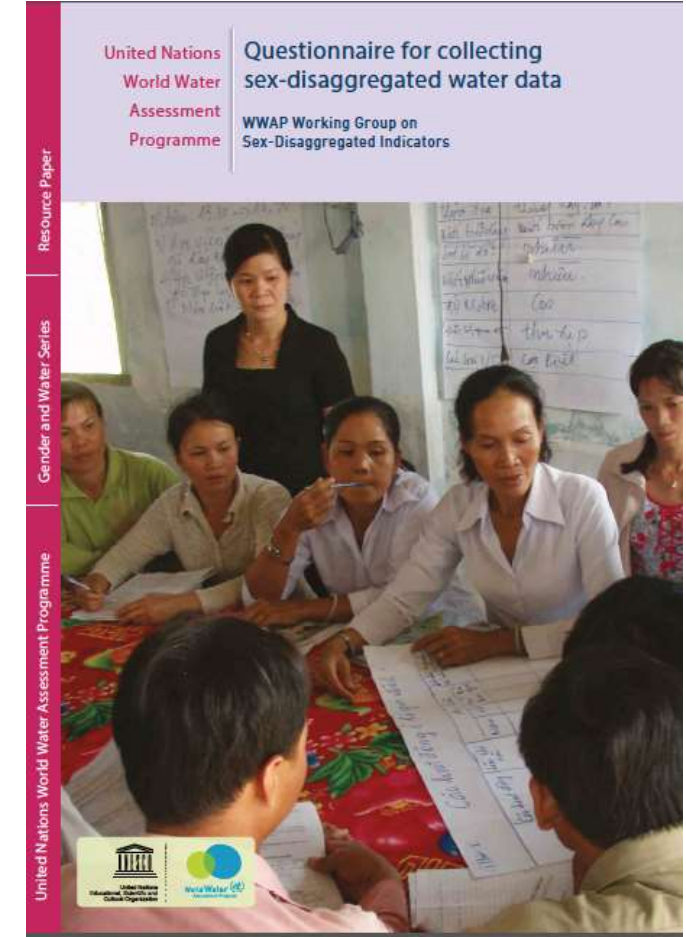

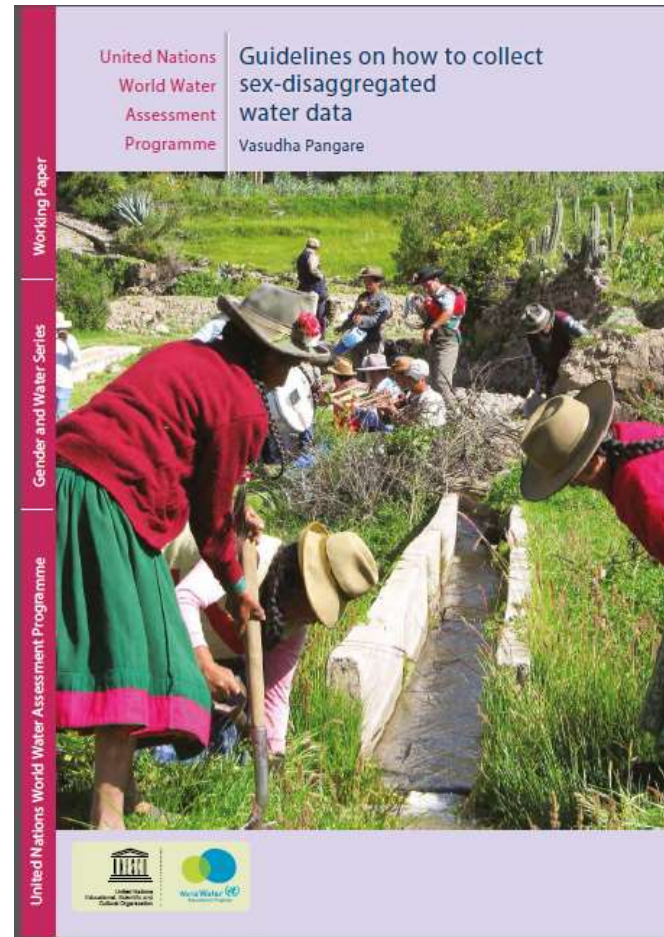

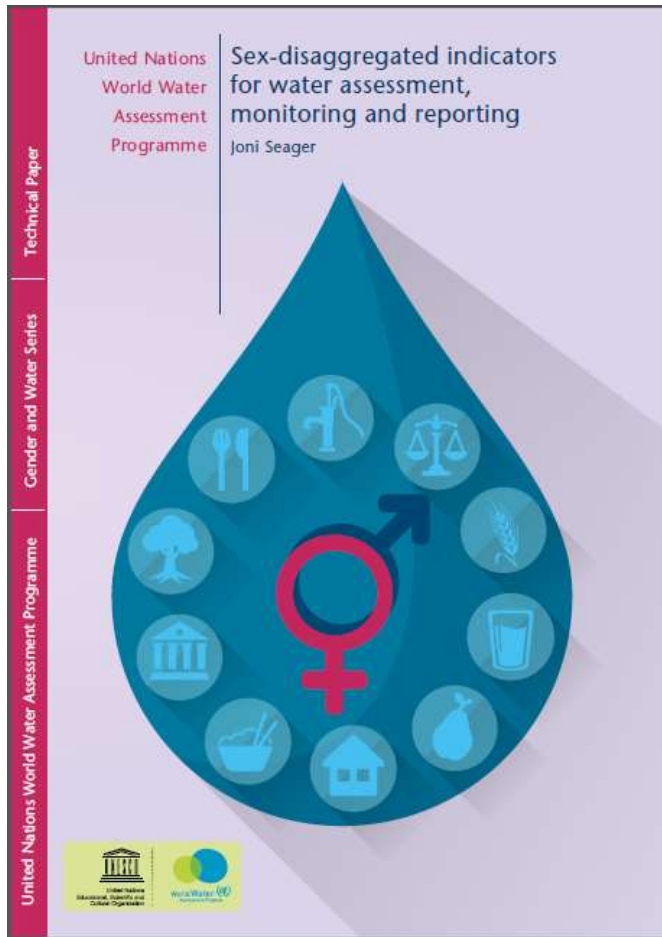

The main output of PHASE I: the Toolkit on Gender Sensitive Water Monitoring Assessment and Reporting :

The Toolkit is composed of 4 tools:

1. a list of high-priority water indicators identified by the international expert group for which gender-disaggregated data is especially needed; (September 2014)
2. specific methodologies for collecting and assessing such data; (November 2014)
3. a set of guidelines for “in-the –field” data gathering with specific insights for different world regions; (August 2015)
4. a questionnaire for practitioners on gender-disaggregated interviews and data collection (August 2015)

WWAP TOOLKIT ON GENDER SENSITIVE WATER MONITORING ASSESSMENT AND REPORTING

1&2: Indicators & Methodology 3: Guidelines

4: Questionnaire

SEX-DISAGGREGATED WAER INDICATORS

5 MAIN GROUPS/GRAND TOPICS

- 1) WATER GOVERNANCE
- 2) SAFE DRINKING WATER SANITATION AND HYGIENE
- 3) DECISION-MAKING AND KNOWLEDGE PRODUCTION
- 4) TRANSBOUNDARY WATER RESOURCE MANAGEMENT
- 5) WATER FOR INCOME GENERATION FOR INDUSTRIAL AND AGRICULTURAL USES, INCLUDING UNACCOUNTED FOR LABOUR

METHODOLOGY

- 1) FACT –FINDING (official records, desk-based)**
- 2) PARTICIPANT OBSERVER STUDIES OF GROUP/PUBLIC ACTIVITIES (fieldwork)**
- 3) INTRA-HOUSEHOLD SURVEYS (fieldwork) (no “head of household” technique)**
- 4) SELF-ASSESSMENT**

Particular aspects of methodology:

- Anonymity for sensitive questions**
- Use of mobile phones and big data if possible (according to sample)**
- Sex-separated interviews**

EXAMPLES OF INDICATORS

GOVERNANCE one example

1.j. The presence and nature of gender-specific objectives and commitments (or gender strategy) in national and sector-level water policies.

TRANSBOUNDARY WATER RESOURCE MANAGEMENT (example)

4.b The extent to which gender outcomes and gender-sensitive accountability indicators are included in M&E impact statements and benefit analyses of TB agreements and activities

EXAMPLES OF INDICATORS

DECISION MAKING AT THE INTRA-HOUSEHOLD LEVEL

3.e M/F expressed priorities of water use within the household

UNACCOUNTED FOR LABOUR IN AGRICULTURE

5.C Gendered division of labour related to irrigated farming

ACCESS TO TRAINING AND SUPPORT SERVICES

5.g M/F access to support services for irrigation(training ,bank loans)

PRACTICAL EXAMPLES OF APPLICATION

- *AMCOW (African Council of Ministries of Water) endorsement*
- *UNESCO IHP :assessment of transboundary groundwater in Namibia, Botswana, South Africa, El Salvador, Guatemala, Uzbekistan (see IHP GGRETA PROJECT)*

POST-2015 AGENDA AND SDGs

- UN WWAP UNESCO promote the use sex-disaggregated indicators in the monitoring framework of SDG n.6 on water and other Sustainable Development Goals related to Water and Gender (also in line with SDG 5).
- Via UNESCO channels
- Via UN-Water
- In the Open-platform until 4th of September
- UN WWAP UNESCO will provide position-paper on SDG/gender monitoring (online these days)
